## Professional Summary

Data & Impact professional with a Master's degree in Information Systems Engineering and 3+ years of experience in project coordination, data analysis, reporting, and operations across healthcare, training, and socio-economic development contexts. Certified SIYB Trainer by the International Labour Organization, with experience supporting programme data systems, performance reporting, cost optimization, and evidence-based decision-making. Awarded an Erasmus+ mobility in Data Science in Croatia, with strong skills in Python, Excel, Power BI, surveys, dashboards, and stakeholder coordination. Interested in using data and digital tools to strengthen inclusive and sustainable development initiatives.

---

## Professional Experience

**Project manager – Socio-Economic Data, Reporting & Operations** 10 / 2025 – present  
[OMNIA Project Management](#) , Nouakchott, Mauritania (Full-time)

- Support socio-economic and local value-chain initiatives through financial, operational and field-informed data analysis.
- Analyze monthly activity data, expenses, cost structures and income-generating indicators to assess the sustainability of community-based product initiatives.
- Prepare structured reports for decision-makers to support evidence-based planning, resource allocation, cost control and operational follow-up.
- Monitor community product movement, stock availability and category-level performance to identify market-access challenges and improvement opportunities.
- Participated in field visits to villages to observe local production conditions, collect contextual information and support analysis of community needs and value-chain potential.
- Coordinate a team of three staff members and support reporting, follow-up and implementation of operational priorities.
- Coordinated multi-stakeholder projects in collaboration with international partners such as GIZ and African Development Bank, ensuring alignment with development frameworks.

## Program Officer & Analyst - SIYB Program Data & Reporting

12 /2024 – 09/2025

[Pioneers of Intellectual Development](#) (PIDTC), United Arab Emirates (Full-time)

- Designed, planned, and coordinated SIYB training programmes, supporting training delivery for entrepreneurs and business consultants using **ILO's SIYB methodologies**.
- Led the full project cycle, from **stakeholder engagement** and needs assessments to post-training evaluation and strategic reporting.
- Collaborated with international trainers and institutions to scale program outreach across low- and middle-income countries, enhancing cross-border learning and knowledge exchange.
- Managed and maintained participant, trainer and programme databases, including records on countries, attendance, evaluations, certificates, trainer information and programme results.
- Designed and analyzed pre-training and post-training surveys to assess learning needs, participant satisfaction, trainer performance, feedback and programme effectiveness.
- Cleaned, organized and analyzed programme data using Excel, Google Sheets, Google Forms, KoboToolbox, Notion, Python and Jupyter Notebook.
- Prepared post-training reports and programme evaluation summaries to support management, international trainers and partners in evidence-based decision-making.
- Supported programme improvement by using survey and performance data to recommend content adjustments, strengthen participant follow-up and improve training delivery.
- Coordinated two training cycles comprising multiple programme components, engaging participants from approximately 20 Arabic-speaking countries.

## Marketing & Performance Analysis Lead

09/2022 – 09/2024 (2 years)

[El Chaima Hospital](#), Biskra, Algeria (Full-time)

- Analyzed healthcare-related, financial, operational and satisfaction survey data to support management decisions and improve patient experience.
- Managed and analyzed more than 10,000 patient records while ensuring strict confidentiality of sensitive healthcare data through aggregated reporting, anonymization of personal identifiers and internal-only data handling.
- Designed and analyzed patient satisfaction surveys to identify service gaps, patient experience issues, and improvement priorities.
- Prepared monthly performance reports, financial/marketing analyses and patient satisfaction summaries for stakeholders.
- Used Excel, Google Sheets, Power BI, SQL, Python/Jupyter, Meta Business Suite and Facebook Ads Manager for data cleaning, analysis, visualization and reporting.
- Supported data-driven communication strategies that reached 1 million potential customers in 50 days with less than USD 100 and contributed to a 150% revenue increase in 9 months.
- Led cost-optimization initiatives that reduced communication and printing-related costs by more than 50%.
- Organized successful healthcare events to strengthen the hospital's reputation and community engagement.

**Marketing Data Analytics & Digital Performance Officer** 01/2020 – 01/2024 (4 years)  
Self-employed / Independent Consultant (Part-time)

- Provided project-based marketing data analysis and digital performance consulting services for healthcare-related clients and small businesses.
- Collected, cleaned and analyzed digital campaign data from Meta/Facebook platforms, including reach, engagement, audience response, inquiries, cost indicators and campaign performance.
- Monitored key performance indicators and prepared analytical summaries to support evidence-based decisions on targeting, content strategy, campaign timing and budget allocation.
- Used Excel, Google Sheets, Meta Business Suite and Facebook Ads Manager to track campaign performance, identify trends and recommend optimization actions.
- Compared performance across campaigns, content formats and audience segments to improve communication effectiveness and reduce inefficient advertising spending.
- Prepared client-facing reports and recommendations to support digital visibility, service promotion and customer acquisition.

**Creative leader & Founder** 05/2019 – 01/2025 (5 years)  
Self-employed : [YumeLand](#) & [Wargha Store](#) (Part-time)

- Established a successful online educational brand (Yumeland) for interactive educational games and succeeded in achieving 1,000+ orders and 100+ happy customers.
- Use [gamification techniques](#) to create engaging learning experiences that align with innovative digital training learning pedagogies.
- Co-founded and established a successful online brand (Wargha Store ) that specialized in personalized gifts by managing growth and marketing strategies, advertising campaigns, and financial operations.

**Tutor and Trainer** 04/2019 – 04/2020 (1 year)  
El Amir Abdelkader Association, Sidi Bel Abbès, Algeria (Part-time)

- Provide extra classes in English and Mathematics for elementary and secondary school students and plan innovative educational activities using e-learning methods (educational games and AI) to enhance learning experiences.
